PERMIT CONDITIONS AND PROVISIONS

- Prior to any operations associated with the permitted work, and prior to any work along, across, or within the limits of the roadway right of way, Traffic Control Facilities, such as barricades, signs, lights, signals, flagmen shall be provided and established in place and function by the applicant for this permit. The applicant shall also provide any additional traffic control facilities as are required to protect the public from exposure to extraordinary hazard caused by special facilities or operations at the worksite, or by changed or developing conditions, including weather or roadway conditions.
- Unless otherwise authorized, two-way traffic shall be maintained at all times.
- The applicant shall determine the location of, and effectively protect from damage, any facilities already in place in the area affected by the permitted work.
- Any excavations which affect a traveled way portion of the roadway or roadway shoulder shall be backfilled with suitable granular material, placed in layers of 12 inches or less and compacted mechanically to the density of the adjacent ground.
- Blasting within the limits of the roadway right of way is prohibited unless specifically authorized by this permit.
- Any brush, trash, waste, or rubbish resulting from construction or maintenance of the line shall be removed from the roadway.
- All disturbed roadway facilities shall be restored promptly.
- No excavation can be done in the area between the venter of the ditch and the roadway.
- Excavation must be a minimum of two feet from the property line.
- Excavation must be a minimum of a depth of two feet.
